Description

***Crassula falcata* description**

Succulents: Propeller plant (*Crassula falcata*)

Crassula falcata (now correctly named *Crassula perfoliata* var. *minor*), known by the common names **airplane plant** and **propeller plant**, is a succulent plant endemic to South Africa, from the Cape of Good Hope. The foliage is gray-green with striking texture, on plants that grow to 2 feet (0.61 m) tall. The flowers are tiny and scarlet red, that rise in dense clusters above the foliage for a month in summer. *Crassula falcata* is cultivated for use in drought tolerant and succulent gardens, and in container gardens.
